Operational Controls

Manual control

Its operation is simple as the crossbars glide effortlessly along tracks with a basic network of cords and pulleys which are hand drawn or a simple pull stick operation is also optional

Motorization

Motorisation is an option for some installations which can allow for smart phone and voice control with modern devices like Alexa and Siri.

Distributed By:

You can rest assured that your authorized distributor (above) is the very best in your area as we thoroughly scrutineer every distribution application to ensure that our high expectations are mirrored by only the very best and experienced operators who follow our stringent manufacturing, installation and quality control processes.

Overview

The Solare Praesidio is a concertina style awning that is designed to extend under a pergola, glass roof, skylight/light well and any overhead structure that requires shade, or to simply dress the space and create ambience. With a soft feel pleated fabric system it helps to disguise any hard lines.

The Solare Praesidio is sometimes known as the Pleated patio shade or suspended shade and can handle a light sprinkle of rain* but ideally is suited as a shade protection device.

Fabric Options

With a wide variety of fabrics to choose from, the Solare Praesidio System can be made with either tight pleats pulling out flat when extended or with fuller pleats to create a warm designer feel for more elegant results when ambience is the brief.

The depth of the pleats are fully customisable to suit each space. The more crossbars that are integrated means a lesser pleat depth result. This can be an important factor when considering the stacking height when retracted to clear an obstructions like doors, windows or light fittings.

Colour Range

With a full powder coat colour range available you can apply that perfect tone for seamless integration to your area.

Sizing

They are fully custom made to suit any size up to:

Maximum Width: **5.775m**

Maximum Projection: **6.5m**
