

# ROBUSTA

WINDOW AWNING

by **T**TURNILS®

Thanks to the heavy-duty drop arms and roller tube, Robusta is a sturdy window awning especially suitable for large windows.

A stylish aluminium hood protects the fabric and roller tube from the elements. External or internal operation is with crank and motor-

ization is available as an option. Specially designed drop arms and slide rails convert Robusta into a balcony awning.

## Operation

External or internal operation with crank or motor.  
The motor can have automatic controls such as remote control or sun and wind sensors.

## Installation

The awning can easily be installed directly on to the window architrave or the wall.

## Drop Arms

Heavy-duty drop arms with adjustable springs provide excellent fabric tension.

## Components

The selection of anti-corrosion and highly durable materials allows us to offer you a comprehensive warranty. No maintenance required.

## Dimensions

Projection: 0,6, 0,7, 0,8, 0,9,1,0, 1,2, 1,4m.  
Maximum width: 6.0m per unit.  
Series connection up to 25.0m with motor.

## Balcony Awning

With the specially designed drop arms and slide rails, the heavy-duty arms can be adjusted vertically for balcony doors.

Projection: 0.6–2.2m.

Maximum width: 4.0m per unit.
