

G-Screen by

www.lukris.com.au

The G-Screen is a versatile awning designed to suit a range of applications. Its extruded aluminium headbox creates smooth lines lending itself to both modern and traditional architecture. With over 150 colours to choose from, the G-Screen can blend into a traditional home, or it can be a feature of the modern building. Using a BECKER automation system the awning can be operated with the touch of a button.

Manual gear operation is also available.
