

Paravento

SIDE SCREEN PANELS | PRIVACY + WIND PROTECTION

Even if you are on very good terms with your neighbours, you still want to enjoy your privacy from time to time and freedom from curious looks from others. The Paravento side screen is a particularly attractive and practical solution. Our side screen not only looks good but disappears into an elegant cassette when not needed. The screen provides maximum protection from prying eyes as well as from unpleasant winds. Paravento is the perfect compliment to awnings and textile patio roofs.

Sizes: Available with casing heights of 127.5 cm, 187.5 cm and 250 cm.

LED

Conjure up your very personal patio atmosphere with an LED or LED Design light bar. In combination with a Weinor awning or even if fitted separately, the light bar has no difficulty replacing other patio or balcony lights. Remote-controlled ON/OFF provides a convenient way to control your Weinor LED Light Bars. The light-emitting diodes have a long lifetime of some 30,000 hours, helping to save energy & resources.

Tempura

Our heating system is called the Tempura system. This high tech heater will allow you to enjoy your outdoor deck or patio for more hours in the evening and more months of the year as the weather cools. This amazingly efficient and energy saving technology offers the exceptional benefit of going from cold start to it's full radiant temperature within 2 seconds. No more waiting for warmth.

Excellent privacy + wind protection

LED energy saving technology

Tempura heating system. Instant heat
